

Autumn in Maryland is arguably one of the most *beautiful sights* you could lay eyes on in a lifetime, but after all is said and done, and the leaves have made their journey to the ground, your yard needs to be "winterized" for coming snow falls. The color-changing season may be beautiful, but the mess it leaves behind can back-up irrigation to your plants and gardens, clog gutters, create dry rot around your home, and just look overall

ugly

after a while!

It is true that leaves help to protect and provide nutrients to your lawn, but they also *cut off sunlight*

and

hinder the watering or fertilizing process

that your groomed lawn is used to.

Green Machine Lawns offers substantial cleanup services to remove and properly dispose of leaves and branches that the autumn season leaves behind. Like our other services, our prices are competitive and our workmanship is exceptional.

Let us build a lawncare package with you today! We offer lawncare + leaf removal + snow removal at discounted package deals!
